

ID:	211538	Name:	Filip Paul
Address space:			
10.78.128.0/22			
<p>Divide your IP address space into subnetworks as follows:</p> <p>a) make the address space in LAN0-LAN2 subnets as large as possible,</p> <p>b) make the address space in subnets connecting the routers as small as possible.</p> <p>Follow the convention that the gateway of the local networks (LAN0-LAN2) has the lowest possible IP address of the range.</p> <p>(Note: After this division there will reserve for another subnets which could connect only two devices)</p>
